

Oil & Gas

Since 20 years its inception, **Bin Qutab - Oil & Gas** has been actively involved in high profile oil and gas projects in the Middle East, Afghanistan & Pakistan. From facility revamps to grassroots projects, we have delivered engineering manufacturing, construction, commissioning & maintenance services for refineries, gas fields, process plants, pipelines LNG plants and storage facilities.

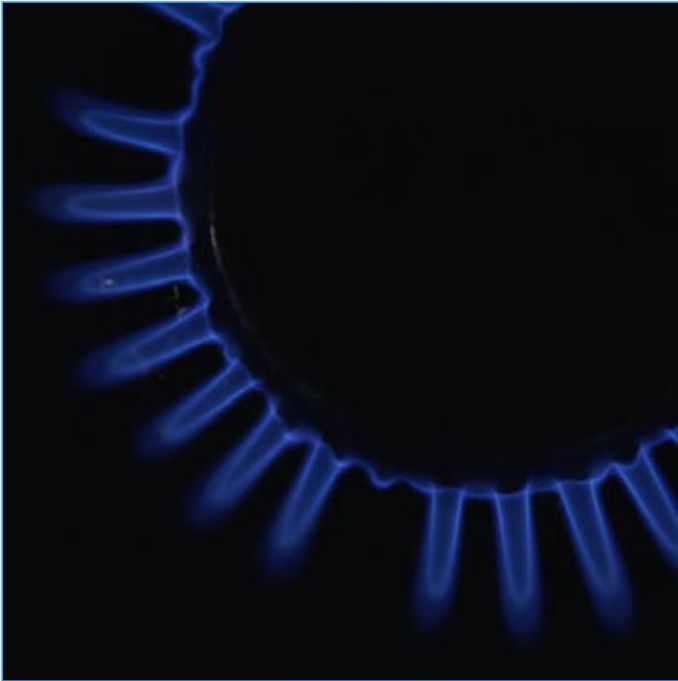

Our joint venture company, Magnet (Pvt.) Ltd. & Bin Qutab is setting new standards for the execution of new projects for oil and gas production facilities.

- Oil & Gas Logistics
- Third Party Distribution Logistics for Hotels and Retailers
- Freight Forwarding

Bin Qutab has more than 10 years of experience in the oil and gas industry with a tested history of excellence in all areas of energy logistics. We operate different warehouse spaces from over 12 locations around the world.

An expansive fleet of vehicles, a commitment to the most advanced technology and a global network of Service Partners enable us to serve energy industry clients in over 11 countries.

Commitment to Technology

To ensure that our information systems keep pace with our services, we have invested heavily in technology. Bin Qutab's client-customized, Web-based, online tracking systems help manage third-party contractors, monitor shipments and timelines and provide management reports for analysis. Our global technology systems provide clients with full "cradle to grave" visibility of their shipments, allowing them to adjust their inventory schedules to better manage their supply chains and reduce their inventory carrying costs.

Total Logistics Management

Bin Qutab Logistics has developed a "Total Logistics Management System" including duty free certificate processing and blanket import permit applications. Our Total Logistics Management approach ensures the timely delivery of all shipments, helps clients keep their importation processes on schedule and control costs.

Urgent Shipments and Expediting

Bin Qutab specializes in urgent shipments and expediting emergency shipments around the world. The system expedites critically urgent shipments beginning from pickup at the origin through to delivery at the final destination. It helps minimize down time and keeps projects running smoothly.

Dangerous Goods Cargo

Often the most difficult cargo to ship is Dangerous Goods (DG) cargo. It requires very special packaging, documentation, permits and handling.

Bin Qutab is fully licensed to handle all types of dangerous goods and regularly ships oil and gas samples, dangerous chemicals and radioactive measuring devices.

Services Overview
